

Postdoc Program between the Freie Universität Berlin (FUB) and the China Scholarship Council (CSC)

Open Postdoc position for CSC scholarship candidates 2015

The postdoc position is only offered to [Chinese](#) who graduated with a [PhD degree from a Chinese university](#).

<u>Department/Institute:</u>	Institute of Biology / Applied Genetics
<u>Subject area:</u>	Plant Molecular Biology
<u>Professor / Research Group:</u>	Prof. Dr. Thomas Schmuelling
<u>Number of open positions:</u>	2
<u>Project title:</u>	Regulation of Plant Development by Cytokinin

Project description:

Cytokinin is a plant hormone regulating numerous aspects of plant development as well as some plant stress responses (see e.g. Werner and Schmuelling, Curr. Op. Plant Biol. 12, 527-538, 2009). The project will explore the mechanism(s) of cytokinin action in the context of a specific function which is addressed in our research portfolio. Currently we are investigating the role of cytokinin in regulating shoot meristem activity, seed germination, lateral root development, chloroplast development and gene expression in Arabidopsis. Part of our work is devoted to transferring know how from model plants to crop plants (e.g. root system size in barley) in order to increase their performance and yield. The exact topic can be discussed depending on interest and background experience. The institute offers excellent conditions and is part of the Dahlem Centre of Plant Sciences (DCPS), which is a focus area of FU Berlin.

Academic requirements:

PhD degree obtained from a Chinese university. Excellent academic track record and very good knowledge of English are required.

Link to professor/contact and further information:

Please note:

In a first step the complete application should submit to the Beijing Office for evaluation by November 21, 2014. Please don't contact the professor before. He will get in contact with you after having received the complete application.
