

In 2007, with its future development concept *International Network University*, Freie Universität Berlin succeeded in winning a major government funding award in the German *Excellence Initiative*. This award acknowledges special academic achievements, giving the title *University of Excellence*. Freie Universität Berlin was able to maintain its excellence status in 2012, one among only a few other select universities to do so. The second phase of this program focuses on the expansion of international and regional networks and the advancement of junior researchers supported by the *Career Path Model*.

To meet these goals, Freie Universität Berlin is setting up several **Dahlem International Network Junior Research Groups (DIN JRG)** that will be managed by junior professors.

Freie Universität Berlin

School of Business & Economics Business Administration – Department of Information Systems

invites applications for a

Junior Professorship in Business Administration focusing on Information Systems Research, Information and Organization (salary grade W 1)

The successful applicant will be required to assume responsibilities in research and teaching in the area named above and manage a Junior Research Group.

Appointment requirements are governed by Article 102a of the Berlin Higher Education Act (*Berliner Hochschulgesetz*).

The appointee will be familiar with current methods and topics in Information Systems Research, especially regarding IT applications in health care or interorganizational information systems. She or he will possess knowledge of Organization and Management Theory including appropriate methodologies. Candidates will have a proven record of empirical research on health-information technologies especially in the areas of innovative IT applications and integrated care concepts. The successful candidate will have experience in university teaching and research (preferably internationally). Furthermore, the appointee will have experience with third-party funded research projects and be proficient in the English language.

The successful candidate will manage a Junior Research Group in the area *Health-IT and Business Model Innovation* that is concerned with the (non-)diffusion of IT applications and integrated health care concepts as well as innovative business models in health care. The appointee will collaborate with colleagues on interdisciplinary joint research projects of Freie Universität Berlin in cooperation with the Charité medical center, and other research institutions.

The junior professor will be appointed as a civil servant for an initial period of three years. Provided that her or his performance is thereafter evaluated positively, employment may be extended for three more years.

Applications quoting the reference code **P 01/14** should include a CV, copies of all certificates of academic qualification, a list of publications, evidence of teaching competence (such as courses previously taught) as well as of involvement in ongoing and future research endeavors, joint research projects and externally funded projects.

All materials, including a private postal and/or e-mail address must be received **no later than [4 Wochen]** at

Freie Universität Berlin
Fachbereich Wirtschaftswissenschaft
Dekanat
z. Hd. Frau Oellers-Reis
Garystraße 21
14195 Berlin
