GERMAN SCIENCE DAY

On the occasion of the opening of the
German Science Centre in Cairo
12 November 2012 - 1:00 PM to 10:00 PM

MEET THE SCIENTISTS

Amongst Others:

Prof. John M. Sullivan (Berlin Mathematical School)
Mathematics & Art

Dr. Johann Büsow (Orient Institut Beirut)
**Echoes of present struggles in the past:
The urban public sphere in Damascus during the
1830s**

Alexander Paprotté (Freie Universität Berlin)
**"Direkt zur Kanzlerin" -
A student's initiative for the promotion of
social dialogue**

Prof. Michael Molls (TU München)
Innovations in Radiation Oncology

Prof. Peter Rutschmann (TU München)
Competing demands on the use of water

Prof. Albrecht Fuess (Philipps-Universität Marburg)
**La guerre des prenom.
Migrating Hip-Hop
between France and North-Africa?**

Dr. Martin Buchholz (TU Berlin)
**Environmentally sustainable
and cost-efficient supply of Energy, Water and
Nutrition**

DISCOVER EXCLUSIVE EXHIBITIONS like

Deutsches Wissenschaftszentrum Kairo—German Science Centre Cairo

Our Mission

The German Science Centre Cairo (DWZ Cairo) provides a platform for German-Egyptian exchange in the fields of Science, Technology and Research, which will deepen the, already excellent, cooperation and partnership between the two countries. It is established on a basis of intensive collaboration that has persisted several decades and saw a remarkable peak in the most successful Egyptian German Year of Science and Innovation in 2007/2008. The DWZ (“Deutsches Wissenschaftszentrum Kairo”) contributes to the synergy of Scientists in Germany and Egypt, bringing together experts from academic institutions, researchers and representatives of industry and government. Especially young scientists are promoted and supported through information, exhibitions, scientific events and networking opportunities. The DWZ is the “one-stop shop” for information about the German research landscape and funding sources.

Our Service

The DWZ Cairo organizes interdisciplinary events on current issues in science and innovation. Concerned subjects are mathematics and physics as well as climate change, waste management, health and renewable energy. It provides information and reference materials on German research and development. Moreover, the DWZ Cairo offers individual consulting on potential cooperation opportunities, and provides contacts to German and Egyptian research institutions and companies. It provides up-to-date research news from Germany and Egypt and furnishes profiles, activities and services of its partner organizations.

The DWZ Cairo represents the many facets of research in Germany, and contributes through its events to its integration into Egypt.
