

# Doctoral positions at Max Planck Institute for Molecular Genetics and Freie Universität Berlin

## We are seeking:

Talented, creative, and enthusiastic graduates who are passionate about the intersection of molecular life sciences and computational sciences and bring strong genome science background

## We offer:

- Funded positions
- Degree from Freie Universität Berlin
- Doctorate start between May and November 2026
- Broad training in molecular biology and data analysis
- Cutting-edge research and state-of-the-art facilities
- Excellent supervision through a thesis advisory committee
- Funding for conferences and research stays
- Flexible curriculum
- Financial support to learn German
- Diverse and international community

Apply until **January 7, 2026 (18:00 CET)** at  
[www.molgen.mpg.de/IMPRS/application](http://www.molgen.mpg.de/IMPRS/application)

## Research projects are available in:

Epigenetics, Chromatin biology, Gene regulation, RNA biology, Developmental and cellular differentiation, Structural biology, Protein biochemistry, Genome analysis, Molecular evolution, Artificial intelligence, Bioinformatics, Mathematics, Statistics, ...
