

Spring Campus, March 27 -31, 2017

**Workshop: “Governing by Numbers - The Role of Indicators, Data and Empirical Evidence in the Political Transformation to Sustainability”, March 28-29, 2017**

*Chaired by Prof. Philipp Lepenies (FUB), Prof. Eran Feitelson (HUJI)*

**Call for Presentations**

Among the member universities of the Alliance, we seek contributions and presentations for the workshop from all disciplines. The idea of the workshop is to familiarize interested researchers with research topics and work in progress of colleagues among the alliance, to network and to find out whether possibilities for future collaboration manifest themselves within the overall topic of how indicators shape politics in general and transformation processes to sustainability in particular.

As this will be a workshop rather than a conference format the value added should stem not so much from learning from past and finalized projects, but from making use of the multidisciplinary exchange of ideas that the Spring Campus provides in order to discuss your approaches, questions, hypothesis or project ideas.

The presentations should be no longer than 15 minutes. Yet, in order to group the contributions together in an efficient way, we would kindly ask you to contact us until **March 10**.

We are looking forward to your participation and ideas.
