**UAS Spring Campus, Berlin, 2016 April 11-15**  
**“Connecting Communities for Sustainability:**  
**Do Universities Matter?”**

## Welcome to Freie Universität Berlin

Freie Universität Berlin is delighted to host the first Spring Campus of the University Alliance for Sustainability (UAS). The UAS comprises the Hebrew University of Jerusalem, Peking University, St. Petersburg State University, the University of British Columbia and the Freie Universität Berlin. The partners focus on sustainability as a holistic approach for collaborating in research, teaching, and campus management. The Alliance combines the strengths of five strategic partner universities to develop joint research and teaching projects on the topic of sustainability. We offer exchange options for students, faculty members and administrative staff from across faculties and the universities to promote sustainability discourse throughout whole institutions. The project runs until 2018 and receives funding from the German Academic Exchange Service (DAAD).

As an international network university with about 35.700 students, more than 200 buildings and 5.100 staff members, all aspects of sustainability are relevant to Freie Universität Berlin - be it in research, education or campus management. This approach builds also the basis for the Spring Campus program and organization.

The 1st UAS Spring Campus shall serve as a platform to share experiences. The program will offer insights into state-of-the-art research in three parallel running research workshops. Participants in the field of campus management are invited to discuss findings concerning different mechanisms of change in the management workshop. The workshops offer the opportunity for exchange and discussion of good practice examples. Networking will be facilitated within the network and beyond.

This booklet shall provide you with useful information regarding the workshops and the city of Berlin. We hope this online guide will facilitate your preparations and your stay in the capital of Germany. It is also intended to encourage you to discover some of the green and sustainable landmarks of the city. Most places mentioned in this guide are marked in this [Berlin map](#).

If you have any further questions, suggestions or concerns, please do not hesitate to contact one of our staff members. You can find our contact details on page [24](#).

## Freie Universität Berlin

The history of Berlin's universities is closely connected with the city's history. Freie Universität Berlin was founded on December 4, 1948, by students, scholars, and scientists with the support of the American Allied Forces and politicians. The move was sparked by the persecution faced by students who took a critical view of the system at the former University of Berlin, at that time called Universität Unter den Linden, which was located in the Soviet sector of the divided city.

Today, Freie Universität Berlin is a leading research institution. In both rounds of the Excellence Initiative, a nationwide governmental competition between German universities, it was selected as one of the 11 universities with excellence status, thereby receiving additional funding for

its institutional future development strategy. Freie Universität Berlin can thus take its place as an International Network University in the global competition among universities. The University's performance in the Excellence Initiative provided funding for several new doctoral programs and interdisciplinary research clusters.

Today, Freie Universität maintains 105 partnerships at the university-wide level, along with 339 university partnerships within the Erasmus academic exchange network and 45 institute partnerships, forming a wide-ranging and tight-knit global network. Each year, about 600 international scholars and scientists contribute to the variety of teaching and research activities pursued at Freie Universität. One groundbreaking development that demonstrates the way the University takes international cooperation to the next level is the seven international liaison offices of Freie Universität that were founded in 2007 – in Cairo, Moscow, New Delhi, São Paulo, New York, Beijing, and Brussels.

The University's Unit for Sustainability and Energy Management is responsible for the integration of sustainability practices in all areas and entities of Freie Universität. The Unit is assigned directly to the Executive Board. For further information about the purpose and responsibilities of the unit please visit our website:

## Program of the UAS Spring Campus “Connecting Communities for Sustainability: Do Universities Matter?”

Following a whole-institution approach, the spring campus will bring researchers, management staff, and PhD candidates and students together to contribute to this discussion. The program will be opened by the president of Freie Universität Berlin Prof. Peter-André Alt, Prof. Dr. Dr. Klaus Töpfer, former Director of the United Nations Environmental Programme and former German Minister for Environmental Protection as well as Walter Hirche, Member of the German Council for Sustainable Development.

Sustainability has become a key global issue in recent years. A growing number of networks, institutions, and stakeholders emphasize the significant role of universities in shaping the discourse on sustainability. Being active in research and teaching as well as managing often large and complex campuses, universities are ideal societal test-beds for sustainable solutions.

But what are the conditions for universities to become more active in sustainability?

In addressing the topic of “Connecting Communities for Sustainability: Do Universities Matter?”, the Spring Campus of the University Alliance for Sustainability will critically reflect on the role of universities as societal actors and the integral function of communities and community engagement. Building and engaging communities to jointly develop and maintain sustainable societal solutions will be paramount in the process of a “Great Transformation”. Within the framework of the UAS, the Spring Campus will also focus on how international networks can connect communities and trigger engagement in sustainability.

# UAS Spring Campus, Berlin, 11-15 April 2016

## “Connecting Communities for Sustainability: Do Universities Matter?”

**Monday, 11 April | Topoi Villa, Hittorfstraße 18**

### Opening Day

Chair: PROF. BRIGITTA SCHÜTT, Vice-President, Freie Universität Berlin

TIME	TOPIC	SPEAKER
12:30 pm	Registration	
1:30 pm	Opening	PROF. PETER-ANDRÉ ALT President of Freie Universität Berlin
	Key Note Speeches	
	Fostering Sustainability at Universities: Mechanisms and Incentives	WALTER HIRCHE Keynote Speaker, German Council for Sustainable Development
	Global Trends in Sustainable Development: Steps needed for the Great Transformation	PROF. KLAUS TÖPFER Keynote Speaker, Patron of the UAS
	Q&A with both speakers	PROF. BRIGITTA SCHÜTT Vice President of Freie Universität Berlin
3:30 pm	Coffee Break	
4:00 pm	Linking Research to Action. The Role of Policy Advice	PROF. MIRANDA SCHREURS Freie Universität Berlin
	The Potentials and Perspectives of Sustainable Campus Management from an International Perspective	DR. BERND KASEMIR International Sustainable Campus Network
	The Campus as an Incubator for Sustainability	PROF. JAMES TANSEY University of British Columbia DR. BERND KASEMIR International Sustainable Campus Network
	Regional Integrated Planning and Management in China - The Influence of Research	PROF. XUE LING Peking University
	A Sustainable Campus in a Sustainable City: Leading Urban Transformation by Example	DR. NIKOLAI BOBYLEV St. Petersburg State University
5:45 pm	Panel Discussion: "Connecting Communities for Sustainability: Do Universities Matter?" incl. Q&A	Chaired by PROF. MIRANDA SCHREURS and ANDREAS WANKE, Freie Universität Berlin
6:30 pm	Reception and Get-Together	

## Overview Parallel Workshops, April 12-13

On Tuesday and Wednesday (April 12-13) we will continue with a program of four parallel running workshops. Researchers may choose to participate in one of the **3 Research Workshops**:

- Workshop I: "Climate Governance in International Comparison" organized by Prof. Miranda Schreurs (FU Berlin), Room L116
- Workshop II: "Education for Sustainable Development – Indicators for Assessment and Monitoring" organized by Prof. Inka Bormann (FU Berlin), Room KL29/135
- Workshop III: "Traditional Watershed Management" organized by Prof. Brigitta Schütt (FU Berlin), Room L113

Researchers and management staff working in the field of sustainable campus management are invited to participate in the **Management Workshop** which will discuss different mechanisms of change, focusing on the role of leadership and middle management as well as on strategies for community engagement.

- Management Workshop "From Vision to Commitment: Sustainable Campus Management" headed by Andreas Wanke (FU Berlin), Room L115

We encourage all participants to exchange and network. Daily plenary sessions from 9:00 to 10:30 with key notes on overarching topics will give you the opportunity to meet and discuss. All coffee and lunch breaks will be organized jointly and provide the space to continue talks.

## Research Workshop I: "Climate Governance in International Comparison"

Organized by PROF. MIRANDA SCHREURS

Considering the importance of climate change, it is crucial to understand the policies and measures being introduced by different major political actors. This workshop proposes to examine climate and environmental policy making across China, the European Union, Russia, Canada and Israel. Combined, these blocks are responsible for close to half of global carbon dioxide emissions. Therefore, understanding their climate policies both at the national and the sub-national levels are extremely important. This also requires an understanding of the broader developments related to the introduction of ecological modernization/ecological civilization and green transformation concepts. It is also critical to consider the potential for cooperation among and between these countries. The workshop intends to focus on these questions.

It is the aim of this workshop to strengthen networking between the strategic partners of the University Alliance for Sustainability and to possibly work out common research projects. Bringing together the different perspectives on climate governance will allow us to identify effective levers for climate protection beyond international climate politics.

**Tuesday, 12 April 2016 | Seminar Center Freie Universität Berlin, Room L116**

Time	Topic	Speaker
9:00 am	Plenary Session, open for all participants	Chaired by PROF. JAMES TANSEY University of British Columbia
	Governing by Numbers: The Role of Statistical Information in Transformation	PROF. PHILIPP LEPENIES Freie Universität Berlin

**7:00 pm** Dinner, Restaurant Tomasa Villa Kreuzberg, Kreuzbergstraße 62, 10965 Berlin  
A bus transfer will be organized from the Botanical Garden (6pm) and the Seminar Center (6:15pm).

---

## Research Workshop II: "Education for Sustainable Development – Indicators for Assessment and Monitoring"

Organized by PROF. INKA BORMANN, ANTJE BROCK, INSA OTTE, THERESA GRAPENTIN

The aim of the workshop is to point out the roles that universities can embrace regarding Education for Sustainable Development. The discussion of best-practice examples will provide the basis for our conversation. We will explore characteristics that are necessary for catalyzing the transformation of societies towards sustainability (through Higher Education for Sustainable Development). In particular, we are interested in the collaborations between universities and other societal actors.

A focus will be on the discussion of their impact or potential impact as well as their transferability based on the analysis of best-practice examples. Furthermore, we will look into the question of the measurability of Education for Sustainable Development and ask what are appropriate indicators for self-evaluation and reporting?

**Tuesday, 12 April 2016 | Seminar Center Freie Universität Berlin, Room KL29/135**

7:00 pm	Dinner, Restaurant Tomasa Villa Kreuzberg, Kreuzbergstraße 62, 10965 Berlin A bus transfer will be organized from the Botanical Garden (6pm) and the Seminar Center (6:15pm).	

## Research Workshop III: "Traditional Watershed Management"

Organized by PROF. DR. BRIGITTA SCHÜTT

During the last years several research projects at Freie Universität Berlin focused on techniques and governance structures utilizing water in ancient societies. Subjects involved come from different archaeological and historical disciplines as well as from law and from geography. In this workshop scientists from Freie Universität Berlin and the Hebrew University of Jerusalem will give brief insights into their research, into research questions and experimental designs to provide a base for ongoing discussions. In the afternoon space is provided to develop further research ideas and questions with the strategic partners of the University Alliance for Sustainability.

**Tuesday, 12 April 2016 | Seminar Center Freie Universität Berlin, Room L113**

Time	Topic	Speaker
9:00 am	Plenary Session, open for all participants	Chaired by PROF. JAMES TANSEY University of British Columbia

## Management Workshop: "From Vision to Commitment: Sustainable Campus Management"

Organized by ANDREAS WANKE, Head of the Sustainability and Energy Management Unit at Freie Universität Berlin & KATRIN RISCH, UAS Project Manager

The University Alliance for Sustainability follows a holistic approach and one of the key areas identified is sustainable campus management. Participants of the UAS Management Workshop have taken up the challenge of actively engaging in the field of sustainability by applying both management and participatory approaches.

The workshop will address the following topics:

- Mechanisms of Change – The Role of Leadership and Middle-Management
- Communication Strategies and Community Engagement on Campus
- Energy Efficiency Projects (excursion).

The Management Workshop is to serve as a platform for sharing ideas and experiences. The program features case studies as well as various opportunities for networking with all stakeholders of the Spring Campus event. Speeches open to all participants will unite the various dialogue strands from all Spring Campus workshops and provide a space to share ideas and expertise from research, teaching and campus management in a joint forum. Additionally, excursions, open spaces and overlapping breaks will allow participants to network.

**Tuesday, 12 April 2016 | Seminar Center Freie Universität Berlin, Room L115**

Time	Topic	Speaker

## PhD Workshop: "Challenges & Opportunities for Sustainability - International Perspectives"

Organized by NATASHA DONEVSKA, INKEN REIMER, IRA SHEFER

This PhD Workshop is part of the 2016 Spring Campus of the UAS and invites 4 PhD students from each of the partner universities as well as PhD students from the Freie Universität Berlin to participate in this weeklong event. The workshop aims at bringing together young researchers from various disciplines to present and discuss their research related to sustainability.

The participants of the PhD Workshop will take part in the general Spring Campus introduction day on Monday, followed by a research workshop on "Climate Governance in International Perspective" on Tuesday and Wednesday. On Thursday and Friday follows the PhD Conference, for which each of the participants prepares a presentation.

Steuwer, Sibyl Dr.	Research Fellow, Environmental Policy Research Center, Freie Universität Berlin
Tang, Jiala	Deputy Director, Office of Planning, Peking University
Tansey, James Prof.	Executive Director of the UBC Sustainability Initiative and the Center for Social Innovation & Impact Investing, University of British Columbia
Tews, Kerstin Dr.	Research Fellow, Environmental Policy Research Center, Freie Universität Berlin
Thie, Melanie	Sustainability Manager, Unit for Sustainability and Energy Management, FUB
Tiberghien, Yves Prof.	Director of the Institute of Asian Research, University of British Columbia
Töpfer, Klaus Prof. Dr. Dr.	Patron of the University Alliance for Sustainability; Founding Director of IASS Potsdam and former Executive Director of UNEP
Trümper-Ritter, Monika Prof. Dr.	Professor, Institute of Classical Archaeology, Freie Universität Berlin
Walk, Heike Dr.	Managing Director, Environmental Policy Research Center, Freie Universität Berlin
WANG Xuedong Prof.	Professor, Peking University
Wanke, Andreas	Head, Unit for Sustainability and Energy Management, Freie Universität Berlin
van Wijk, Josef	PhD Candidate, Hebrew University of Jerusalem
Zohar, Motti	PhD Candidate, Hebrew University of Jerusalem

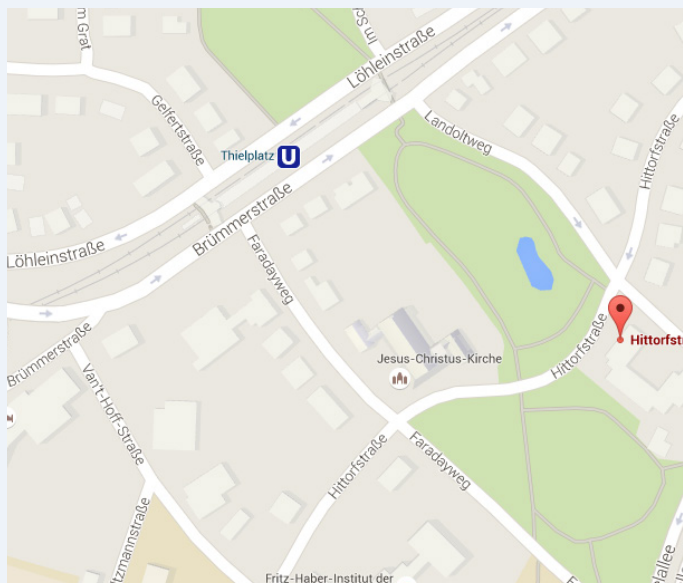

## Evening Program and Venues

### Monday, April 11 | Topoi Villa, Hittorfstraße 18, 14195 Berlin

For the Opening Day we will meet in the Topoi Villa in Hittorfstraße 18. The registration will take place in the entry hall of the Villa starting at 12:30 pm. The nearest subway station is Thielplatz (U3).

#### Topoi Villa

Freie Universität Berlin  
Hittorfstr. 18  
14195 Berlin-Dahlem

## Tuesday, April 11 and Wednesday, April 13 | Seminar Center (Seminarzentrum) of Freie Universität Berlin

The Seminar Center is located in Otto-von-Simson-Straße 26 close to the Subway Station “Dahlem Dorf” or “Thielplatz” (U3). The venue is located on the ground floor on the opposite side of the main canteen.

#### Seminarzentrum

Freie Universität Berlin  
Silberlaube (Erdgeschoss)  
Otto-von-Simson-Str. 26  
14195 Berlin-Dahlem

## Dinner Reception, Wednesday, April 13 | "Tomasia Villa Kreuzberg"

The restaurant is located in Kreuzbergstraße 62. The closest subway station is "Mehringdamm" (U7, U6). A transfer from the Botanical Garden (6pm) and the Seminar Center (6:15pm) will be organized. Participants who will decide not to use the transfer are kindly asked to reach the restaurant on their own.

### Tomasia Villa Kreuzberg

Kreuzbergstr. 62  
10965 Berlin

You will find all the mentioned venues on this [Berlin map](#).

## Getting Around in Berlin and on Campus

Germany's capital is one of Europe's most exciting cities. A "new" Berlin has emerged since the fall of the Berlin Wall, but the city is still constantly evolving. When it comes to creativity, Berlin can compete with every other metropolis in the world. You will find exciting art exhibitions, radical and innovative theatre and opera productions, as well as cool clubs in all parts of the city. It is also a political and cultural capital with a turbulent history which can be experienced in visiting some of Germany's best historical museums. To get an overview on Berlin and its main sights, you can visit the official homepage of Berlin [www.berlin.de/en/](http://www.berlin.de/en/) or the official tourism website [www.visitberlin.de/en](http://www.visitberlin.de/en).

All campus locations of Freie Universität Berlin are located in the southwest of Berlin, mainly in Dahlem, an idyllic and green neighbourhood. The Dahlem Campus hosts 12 of the university's 15 departments and central institutes, more than 20 libraries, various student cafés and canteens – including Germany's first vegetarian university canteen, university sport facilities, and the Botanical Garden. The Campus is surrounded by wonderful green areas. The Lankwitz Campus hosts the Department of Earth Sciences, while the Department of Veterinary Medicine is located on the Düppel Campus.

Campus locations of Freie Universität Berlin: [www.fu-berlin.de/en/redaktion/orientierung/dahlem](http://www.fu-berlin.de/en/redaktion/orientierung/dahlem)

## Public Transport

It is easy to get around in Berlin as public transportation can take you everywhere. Berlin public transportation network (BVG) regular tickets can be purchased at ticket vending machines located at the stops, train stations, in streetcars, or directly from the bus driver. **Each ticket must be validated in a stamp machine** located next to ticket vending machines. For ticket prices, timetables, routes and more information see the BVG website: <http://www.bvg.de/en>

If you are planning to stay a couple of days longer than just for the workshop, a bike can be a nice way to get around. You can use a bike-sharing system of Deutsche Bahn (the German train company) with stations everywhere around the city (<http://www.callabike.de>) or just rent a bicycle at one of many bike rentals in Berlin – just google it (e.g. “rent a bike Berlin”). For directions, you can use the bbbike route planner, which was developed for cyclists in Berlin: <http://www.bbbike.de/cgi-bin/bbbike.en.cgi>. It is quite useful if you want to avoid big roads with heavy traffic.

## Green Berlin: Sightseeing and Practical Information

Berlin is less widely known for the extensive forests and garden plots scattered throughout the city, which contribute greatly to the quality of urban life. While Berlin is a large urban region, it is home to vast parklands such as Grunewald, Treptower Park, or the Gardens of the World, and a myriad of bridges crisscrossing the rivers and canals. Both features give the city not only a feeling of spaciousness, but also of remarkable green beauty. The most recent example of Berlin’s spaciousness is the former Berlin Tempelhof Airport, which was recreated into a public park. An extensive and affordable public transportation system makes it easy to get around the city. Thanks to a recent public initiative, there is an increase in traffic of bicycles and electric cars. Further information can be found on the website of the Senate Department for Urban Development and Environment or in the Environmental Atlas.

To get to know some of Berlin’s green and alternative sides, you can go on one of the 20 Green Walks or join a sustainable walking tour. There are various groups which offer such tours, e.g.:
