

Expression of Interest for Hosting a Marie Skłodowska-Curie Postdoc Fellow

Department/Institute
Freie Universität Berlin Department of Mathematics and Computer Science Institute of Mathematics
Scientific requirements & topic for postdoc position
Numerical methods for partial differential equations The “Numerics of Partial Differential Equations” group develops fast and robust algorithms for linear and nonlinear, and in particular nonsmooth partial differential equations. The methodical focus is on adaptive finite elements, multigrid and discretization methods, convex minimization and free boundary value problems. Current applications concentrate on biomechanics, biomembranes, geoscience, and material science.
