

**SAVE THE DATE:
22nd INTERNATIONAL HERUG CONFERENCE 2019 at TU BERLIN
Wednesday, May 15 – Friday, May 17, 2019**

Dear colleagues of the SAP HER community,

we are currently in the midst of digital transformation and are aligning our SAP systems for the future.

As every year, at the international SAP HIGHER EDUCATION AND RESEARCH USER GROUP (HERUG) meeting we want to exchange ideas among practitioners and share specific experiences and insights into new projects and technological innovations.

The SAP world is getting ever more complex. Thus, in addition to our HER business needs and current challenges and trends such as S/4 HANA, CLOUD and LEONARDO, also topics like postmodern ERP, Enterprise Architecture and IT Governance shall find an appropriate place in the program.

The 2019 conference will take place from May 15 to May 17 at the Technical University of Berlin in the heart of the German capital. For those who want to get to know the fascinating metropolis of Berlin better, there will be a joint city tour on May 14.

Further information will follow shortly.

Yours
Michael Wilmes

Conference Chairman

About HERUG

The SAP Higher Education and Research User Group (HERUG) is a user group for all education and/or research institutions that are using SAP software in a productive environment. The HERUG conference provides its members with the opportunity to share experiences and network with other SAP Higher Education and Research customers around the world.

About TU Berlin

Technische Universität Berlin is located in Germany's capital city in the heart of Europe. Our academic activities are focused on achieving sharply-defined goals: building a distinctive profile for our university, ensuring exceptional performance in research and teaching, providing our graduates with excellent qualifications and a modern approach to university administration. The TU Berlin strives to promote the dissemination of knowledge and to facilitate technological progress through adherence to the core principles of excellence and quality. Strong regional, national and international networking with partners in science and industry are an important aspect in these endeavors: <https://www.tu-berlin.de/menue/home/parameter/en/>

Conference Venue

MAIN BUILDING - Hauptgebäude der TU Berlin, Straße des 17. Juni 135, 10623 Berlin
