

# THE PROJEKT DEAL AGREEMENT FROM A TO Z

As of 2019, researchers from Projekt DEAL institutions in Germany can now read all Wiley journals and publish their own primary research and review articles open access, retaining copyright of their works. The publication costs will be paid centrally by participating institutions.\*

## ARTICLE PUBLICATION CHARGE (APC)

Typically, open access journals charge an APC to cover the publishing costs. Under the Wiley/Projekt DEAL agreement, centralized funding is available to eligible authors to pay for the APCs and the “Publish and Read (PAR)” fees.\*

## BENEFITS

The Wiley/Projekt DEAL agreement aims to make open access publishing easy for you. You can publish your articles in more than 1,600 hybrid and gold OA Wiley journals, while the publishing costs related to the agreement will be paid centrally by participating institutions.\* You can also read all articles published in Wiley journals, dating back to 1997.

## COPYRIGHT

At Wiley, authors retain the copyright for their articles under a **Creative Commons License** so authors who publish open access do not need to transfer the copyright to the publisher.

## CREATIVE COMMONS LICENSE

With **Creative Commons licenses**, the author retains copyright and the public is allowed to reuse the content under different circumstances. The most liberal license is CC-BY. When you publish open access with Wiley, you grant a license to publish the article and to identify Wiley as the original publisher.

## ELIGIBILITY

As an eligible author, you may publish open access in Wiley’s gold OA journals (OA workflow) or hybrid journals (OO workflow).

You are eligible for Projekt DEAL funding, when you meet the following criteria:

- You are affiliated with a Projekt DEAL eligible institution in Germany (see list of institutions [here](#)).
- You are the corresponding author of the research article at the point of article acceptance.
- The affiliation you select during submission must be stated on the published paper.
- All primary research and review articles qualify.

Check your eligibility for Projekt DEAL funding [here](#).

## FUNDING

With the Wiley/Projekt DEAL agreement you don’t have to worry about who is paying the publication costs for your open access paper. Institutions will cover the APCs for publications in gold OA journals and the “Publish and Read (PAR)” fees for publications in hybrid journals centrally.\*

## GOLD OPEN ACCESS

The final, peer-reviewed publisher version of the manuscript is made freely available online, immediately and permanently, for all to read, download, and share. You may choose to publish in a fully open access journal, or in a hybrid journal. **Gold Open Access** is a pay-to-publish model.

## GOLD OPEN ACCESS JOURNAL

All published papers are open access which means that researchers worldwide can read, download and share your article for free. There is no subscription from your library or institution needed. **View the full list** of Wiley's gold Open Access journals.

## HYBRID JOURNAL

Subscription-based journal offering authors the choice to publish their accepted article open access. Subscription fees are typically adjusted so researchers and institutions don't pay twice. Wiley publishes over 1,500 hybrid journals, also referred to as "OnlineOpen". Publish in any of Wiley's hybrid journals that offer OnlineOpen. **View journal list.**

## LICENSING

At Wiley, authors who decide to publish open access are offered a choice of Creative Commons licenses (CC-BY, CC-BY-NC, CC-BY-NC-ND).

## ONLINEOPEN (OO)

Most of Wiley's subscription-based journals (also referred to as hybrid journals) offer you an open access option called **OnlineOpen**. Under the Projekt DEAL agreement, OnlineOpen is available for all hybrid journals.

## OPEN ACCESS

**Open Access** publication means immediate, permanent, free, online availability to articles. Choosing to publish your research open access, will increase the visibility and accessibility of your research.

## PUBLISH AND READ (PAR) FEES

Wiley and Projekt DEAL negotiated a so-called "Publish and Read (PAR)" fee to cover the costs for open access publications in Wiley's hybrid journals. The PAR fee combines the publication costs for OA articles in hybrid journals with the reading access to subscription content, and will be paid centrally by the participating institutions.
